What topic do you like to get added or deleted to this course?

the course is well balanced.
Too much course. Some portions need to be shifted to FM-1.
The course needs no change
The number of topics covered is just too much
International Finance, financial products used abroad
Everything was good.
Most of the topics seemed like repeated from FM-1 instead some additional topics like Derivatives may be introduction to credit derivatives and other options etc can be done
The topics are good enough, no need to change the syllabus.
nothing..it is very good learning experience
It would be of great help if topics related to bonds and fixed income securities were covered in greater depth
For non finance oriented person like me, the course topics suggested this to be an interesting course. But the way the course was conducted, actually waned my interest for the course. I would have preferred a detailed understanding provided in the classroom, with a real example highlighting the actual application, with balance sheets, newspaper articles and how to make meaning of these statements.
I guess, the course is very vast..It should be a bit constrained so as to facilitate in depth knowledge..

What specific suggestion would you like to give to the course instructor?

Evaluation is really unfair. Some people got 4 assignments checked while some got only 2!
- No. of assignments should be reduced.
- If a quiz is suddenly considered to be mid-term, this should be informed beforehand, along with its weightage.
- Amount of negative marks on not submitting an assignment or for being late or for submitting
