10.	Communication of feedback: sufficient and timely	47	31	21	15	2	4	4.78	4.79	3.14
11.	Overall rating for the course	54	39	21	3	3	0	5.15	5.15	3.16

What topic do you like to get added or deleted to this course?

Though the course is very well structured and well taught, the extent of coverage of the course can be reduced for PMIR students. The course demands too much of the time of a student who just a basic understanding of finance is sufficient for HR students

the syllabus is very exhaustive, arbitrage models explanation would have been appreciated

If some topics related to HR accounting (on the lines of what infy does) are added, it would add much more value to PM&IR students

There are a number of topics that are covered in the course and at the end, we dont have a clear picture..Covering too many topics gives a very hazy picture. Instead, I would suggest cover not all but three-fourths of the topics that are covered since at the end not all has equal interest in Finance.

The course is just perfect for finance dummies!

HR relevant finance topics should be included.

The course is vast, and almost every class has a new topic. Some topics need to be delved in details, and hence some topics may be deleted from the course

Can actually think of reducing the vastness of the course, can include topics like Futures and hedging in one session instead of clubbing it with newspaper reading, and can reduce the length of the 1st session, this would help in grasping the concepts related to derivatives.

Not applicable

What specific suggestion would you like to give to the course instructor?

Give some examples on various jargons from a lot many well known companies. It tends to be limited to Reliance and HUL.

Excellent course and teaching.

When assignments are checked at random, students may lose out some assignments where they had researched well and was not checked or the opposite of this. □

To atleast partially mediate for this, at the End of the term each person could be asked for one
